

# AGE-FRIENDLY

Franklin County & North Quabbin

Dear friends and age-friendly champions,

We are excited to announce the hire of Jason Molony, MSW as our new Age-Friendly Program Director.

With extensive experience serving older adults and caregivers in community engagement, program development, and health systems, Jason brings a wealth of expertise to this role. He has led several initiatives to create age- and dementia-friendly communities, particularly for marginalized older adult populations. For example, he helped create the first Dementia-Friendly neighborhood in Chicago during his time at UChicago Medicine. Jason is also a dedicated advocate of the Village movement, having served as a founding board member, employee, volunteer, and funder of Villages. His leadership as Executive Director at the Massachusetts Artificial Intelligence & Technology Center for Connected Care in Aging & Alzheimer's Disease further honed his strategic planning and partnership development skills in the Pioneer Valley and

beyond, as well as a broad understanding of technology as it relates to aging.

Jason's passion for addressing the root causes of inequitable health outcomes for older adults aligns with LifePath's mission, and we are confident that his leadership will significantly enhance our Age- and Dementia-Friendly initiatives in Franklin County and the North Quabbin regions.

Please give Jason a warm welcome, and we look forward to our continued collaborative efforts toward making our community more age- and dementia-friendly!

Sincerely,  
Lynne Feldman  
Associate Executive Director
